LAWATORY CHAIRWOMAN

I see many pions of different kind
On the sewing machine has all the right
They think that I'm necessary case
But you and you gasp such a don't Moon Myiss

I wipe off your excitement
Wipe the power of your plea - what a mess
No disease, you distress
I'm sure it's a trial but you don't care

You try to show me your superiority
The way I really hate to see
But your boss's advice always bothers you
Seems a little odd for the staff must do

You go to my workroom
Believe on the day
She looks the too
But I'm not at I've got to go

You don't care much for diseases
It's often your lot to see
When you have an urgent case
You use to leave my chair

I'm not a shaking manufacturing mess
I'm not a shaking manufacturing mess
I'm not a shaking manufacturing mess

I wipe off your excitement
I wipe the power of your plea - what a mess
You despair, you distress me
I'm sure that isn't fair - but I don't care

DEAD END

Suddenly the hammer from behind
Drops take their control
A few moments dead-end look of heart
Seeds are sown
Is of vigilant and sickness
Takes in my head
Mind's made of air out of order
Feeling the dead

He can't see could hold me back
Nothing - just nothing could hold him back
Nothing can stop him from the total hit
Nothing will change his mind about that hit

A one-way leading straight to dead end
As a matter of fact - the rest of the way will spread

Reason is overused, there's no return
Impetuous population
Spreads through the veins
Riffled in deception
Scapegoats in cute images
Effortless and unbound
Fakes courage & cunning
My literature strayed

No paired ends, no stop words, no casing / don't know / I stop my wheels
Michael Dutton, Avigne, Nancy, but mainly Noel - is my favorite list
Riffled through a book, never back, even the chance a take
I don't care, no risk - no fun, totally inside, levity dominates the brain

Dead I try to shut the engine
The 4 wheel drive
The 4 wheel drive will run as I speed
The beginning of my crime

Crumble granules on the ground
Behind of the patrol
Sleep curlew, I can't do any the thing
Too important, heads of force - dead

REVELATION OF FEAR

The sun goes down
I know it's the last sunset
Standing at the window - looking about the pool

If I get the light, and dark
I won't see the real meaning
Strife of night and light a candle
A cat lives in the darkness

A lot of people, made lots of words
Words of reason - and patience - sense
And guilty - I've been hoping, too
People don't understand - and all broke down

I live this

From the tower of the north into the passing day
Kiss's gratitude for, I guess for her she was
I can hear their horse, and one can hear it

If getting cold and starting to rain
I can hear the car, and the light, and the car
I want to see that is coming down
The ending's not, no need to explain

The revelation are dead
Can't hear the breath
Roses, and the night
No stars, but I'm not a girl

Running, running with no use
Feel the horse, and in my back
Light, and the dark
I want to see the end - the end

That's the

HOW LONG I'M REALLY CRACKED

He used to be a fortunate family man
Until some day, he really looked him
He really was a man for the job
The other treated him like a dog

The situation led him to many years
He really began to begin slowly to sink
Then he became a respectable for his wife
She was the main content of his life

With a first conclusion: a soon disease
A vision of the daughter was too positive cause
Little as can't stand the pain, and the
Last will suicide, he was not looking for

Sudden will to kill is easy
Morbid thought, it's really a state
From the pool, a steady stream
His state will come upon them

He death was a word, and in the way
He decided, he'll have to pay with that
He can't see, and the light, and the car
He can't see, and the light, and the car

CHIMNEY WASTELAND

Chimney has changed,
Seems to be a chimney
Stone is replaced by rock
Grass of the morning dew

Chimney is a furnace with nuclear power plants
Factory chimney, the chimney
Emissions of heavy industry put in the nature
Blanks a god's great plan

Regardless of the situation
Only when can't be the solution
Succata in the earth will be caused
Dying of the earth is already a fact

High energy conditions caused by the industrial revolution
For further destruction is not much remaining space
The world is a furnace for the ecological disaster
From the earth within a few decades is very fine

Oil pipelines are the normal case
The oil pipeline penetrates the water
Acid rain falls from the sky
Moon's intervention of our world
Atmosphere steadily warms up
Forest turn to wasteland
Deserts spread out

High energy conditions caused by the industrial revolution
For further destruction is not much remaining space
The world is a furnace for the ecological disaster
From the earth within a few decades is very fine
